

# Climbed Karioi lately?

**THIS IS YOUR CHANCE!!!**

**Sat 3rd Sept**

The Karioi Biodiversity Restoration project is a community led project, run in partnership with Te Whakaoranga O Karioi, A Rocha Aotearoa New Zealand, the Department of Conservation and the Whaingaroa Community.

On Saturday we will co-ordinate the deployment of 52 stoat traps across the mountains main track from Te Toto Gorge (Karioi Track) to Ruapuke Rd (Wairake Track) – weather permitting – these will be checked monthly by volunteers (Sunday is the back-up deployment day).

**Where:** 240 Maungatawhiri Rd (*large barn on right side of road*)

**Bring:** warm clothes & good shoes, food & water for the day  
– a large backpack for your trap! (400x250)

**Logistics:** there will be groups starting at both ends of the track across the mountain  
– providing easier and more challenging grades and distance to choose from  
– option to traverse across or go up and down again.  
– Carpooling and help with transport would be appreciated.

*If you would like to be a part of this day or on the team that will be scheduled to check traps during the year then we would love to hear from you!*
